

Intelligence and Aptitude test (iA)

- Useful for 10th to 12th standard students.
- This test measures abilities, orientations and coping styles.
- Computerized test as well as available in written format.
- Available in English, Marathi and Hindi languages.
- Test duration 2.30 to 3 hours.
- Test report handover immediately after test completion.
- Individual career guidance (education guidance) based on the report.

About the test:

- This test measures eight abilities namely Cognition, Reasoning, Figural Memory, Spatial, Verbal, Social, Numerical ability and Numerical Memory and five orientations namely Knowledge, Practical, Artistic, Social and Power as well as coping styles.
- This standardized test is based on Guilford's Structure of Intellect (SOI) model. This test is available online and can be administered all over India.
- Online as well as written Group testing in schools and colleges is possible all over India. There is no difference in the test content of online and written form.
- Psychologists are trained for test administration and supervision.
- Reports are given within 10 to 15 working days for written test. Test report is available in any English, Marathi and Hindi language.
- Student report consists of the scope for improvement as per test scores in detail along with the Future planner booklet.
- Trained career advisors of JPSS conduct the guidance sessions. In case of the group guidance sessions report explanation is done in groups and stream suggestions are given on individual basis. At least one parent should accompany the student to attend the guidance session. The duration of individual guidance session is approximately half an hour.
- Career advisors explain the report thoroughly while considering the family background of the student, student's interest and what the actual test report suggests after which educational field is suggested. All the queries and problems regarding the student's career are discussed by the career advisor in the session.
