

### Feedback received from the faculty of both the diplomas regarding both programs

Course taught (tick whatever applies)  
16 responses

#### Further suggestions for course content/ syllabus/ structure

1. I guess this is more of self-reflection. Would like to focus on evaluation methods and also cross check the course content for attainable skills. I wonder about the professional opportunities, I need to have more feedback from students regarding this. Also will share a list of essential texts for the library.
2. As I was teaching the course online, the one-on-one interaction with learners was limited. I feel that personal interaction would have been better. Methods for assessing assignments can improve e.g., the use of software to check for plagiarism could be done.
3. Access to some relevant scientific journals and latest publication text books would add to the richness of content
4. Excellent unique courses. Need more scale up.
5. A more hands-on approach could be better suited for the students who will be working on the field in the future. More time relevant additions to the syllabus could be beneficial.

## Feedback Analysis

PGDSP 2022-23

### 1. Most engaged in the course

- Around 75% of students felt productively engaged during Group guidance sessions.
- Around 20% during CCDP sessions.
- Students also found themselves engaged during guest lectures.

### 2. What action that anyone (teacher or student) took in the course during the year did you find most affirming and helpful?

a) Students applauded teachers' support for personal and academic issues, effective teaching strategies like application-based assignments beyond the syllabus are appreciated, and encouragement from teachers during difficult times.

b) Students liked the emphasis on Psychological Well-being which was seen in Individualized Support and Counseling of students.

c) Teachers are commended for group assignments, study groups, and group guidance that contributed positively to the learning experience.

d) Encouragement and Positive Feedback:

Teachers are recognized for their encouragement and positive feedback.

Individual strengths are acknowledged, and constructive feedback is provided in a motivating manner.

e) Open Communication:

Teachers are described as open and available for problem-solving, creating an environment where students feel comfortable discussing any issues.

Freely talking with students and encouraging interaction in classes contribute to a supportive atmosphere.

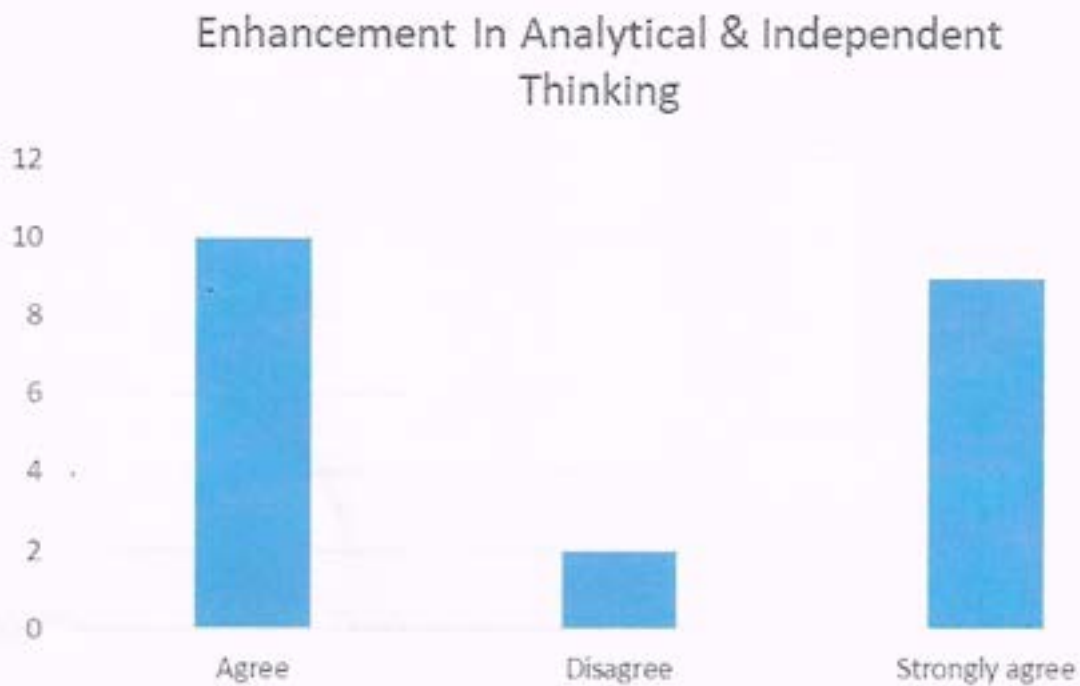

### 3. Enrichment in knowledge during the course:

#### Enrichment in Knowledge

3/12/23

**4. The course enhanced analytical and independent thinking.**

**5. Satisfaction with the course.**

## 6. Challenges faced during the course

## 7. Most liked aspect during the course.

- a) Practical exposure
- b) Hands-on experience

#### Rating for the faculty

### 11. Your take away from the course

1. I learnt a lot of things in a dynamic perspective, interactive sessions and individual opinions always were considered also the most important part I met Dr. Sternberg and his important aspects gave a touch to intelligence more in depth.

2. More self confident and also helped to develop interest in the field.

3. This course has given me a core knowledge about psychology and counseling. Very much useful course for the people who want come into psychology and counseling field form different backgrounds.
4. Self-confidence and patience
5. Quest of learning, developing in depth knowledge about the field I am working in, striving to better myself always, and contributing to the larger society and nation in ways possible.
6. Different aspects of dealing and analyzing the situation
7. Change my perspective of looking towards world.
8. As i was not familiar with psychology background but got to understand the concept of it and counseling to
9. Learning has no age, it's always challenging yet enjoyable experience. Assignment is something I liked reading about, thinking about so a take away for me was when you think about a situation, a problem think about it through all the perspectives.
10. To be non-judgmental, to be soft spoken, thinking from other person's perspective.
11. I got to learn many academic as well as life lessons that I had previously missed upon. The learnings will stay with me for the rest of my life and I will forever be grateful to JP for them.
12. If you want to bring the change in others, first we have to bring those changes consciously in ourselves and then only we can be a part of change in our lives and society.
13. Learnt a lot about different therapies which are very important in counselling and this course also helped me to change my attitude towards the way we think and look at other people.
